# URBINO™ TACTICAL STOCK SYSTEM

#91550  
Urbino Tactical Stock for Remington  
(Cheek Riser, Limbsaver, 12-GA)

The Urbino Tactical stock, named after the city in northern Italy where Benelli Armi SpA is headquartered, is a fixed-length shotgun stock made in the USA from injection-molded glass-filled nylon. Developed to meet the needs of law enforcement and military operators, the rugged Urbino Tactical stock features a “tactical” 12½ inch length of pull (LoP), soft urethane rubber grip, optional Limbsaver® butt pad, optional adjustable cheek riser and a variety of flexible sling mounting options.

The reduced LoP makes the Urbino the first truly tactical stock for the Benelli M4. A shorter stock is necessary for use in tactical applications, especially with body armor. The Urbino Tactical stock is durable, easy to shoulder and will not slip.

The Urbino Tactical stock is also *comfortable*, thus reducing operator fatigue, especially during prolonged training and qualification sessions. The urethane rubber grip is padded at the rear to reduce recoil impact against the web of the operator’s hand, and the optional Limbsaver butt pad substantially reduces felt recoil.

The field-adjustable cheek riser was developed to provide superior cheek weld when using optics. The cheekpiece snaps onto rails molded into the sides of specially equipped Urbino stock armatures. In the event of optics failure, the cheek riser can be quickly removed or readjusted to a lower level. Specially-developed SureShell™ shotshell carriers can be fitted to the cheek riser (see page 16). While rail-equipped Urbino stocks can be used without the cheekpiece, cheek risers cannot be fitted to stocks that do not have the rails.

All Urbino Tactical stocks include Benelli-style rear sling loops for 1¼ inch sling webbing. In addition, a hole at the lower rear of the stock accepts QD style sling swivels (not included). Urbino Tactical stocks can also be fitted with any of a variety of optional steel pocket sling mounts similar to those offered for our Remington telescoping stock adapters. Pocket sling loops, hook loops and push-button sling swivel mounts that fit securely between the Urbino stock and the shotgun receiver are listed on page 25. Urbino Tactical stocks for the Benelli M4 are available in black or coyote color. Urbino Tactical stocks for the Remington platform will be available in autumn, 2010.

# TELESCOPING STOCK AND ADAPTER KITS

#91260  
LEO Telescoping Stock Kit  
for Rem 870

The concept behind the telescoping stock system is simple: the shotgun stock is replaced by an adapter, which attaches to the rear end of the shotgun's receiver and it, in turn, mimics the rear end of an AR-15 lower receiver, into which an AR-15 receiver extension tube can be threaded. The AR-15 telescoping stock and pistol grip can then be reliably attached.

Our stock adapters are investment cast aircraft aluminum, which are then CNC machined and anodized with a Type III Class 2 mil-spec finish. The ITT Enidine recoil buffer is also CNC machined from 6061-T6 aluminum and meets the stringent standards of military and law enforcement users.

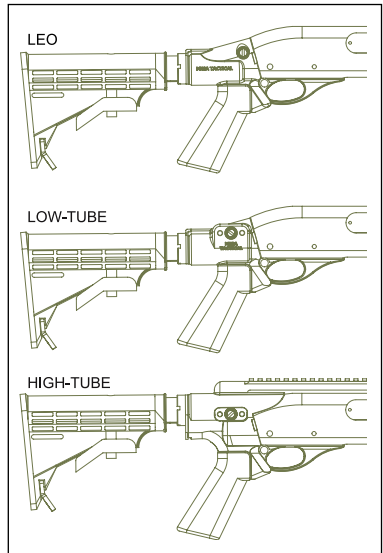

To meet the divergent requirements of professional operators, we offer three lines of telescoping stock systems: High-tube™, Low-tube™ and LEO.

The LEO adapter, manufactured for the Remington 870 and Mossberg 500/590, is our most basic, best-selling model, and features an optimal stock elevation allowing the use of iron sights or even the bead sight. All LEO adapters accept optional push-button sling swivels, and Remington 870 LEO adapters can accept stamped steel sling loop and hook loops. The LEO's low cost and streamlined appearance make it the best choice for agencies looking for a simple, reliable telescoping stock at an affordable price.

Our High-tube and Low-tube adapters, with mounting points for Picatinny rails, SureShell™ shotshell carriers and other accessories, are specialized adapters for unusual law enforcement applications or competition.

Accessory mounting points on the sides of the High-tube and Low-tube aluminum adapters accept Picatinny rails, sling mounts or Mesa Tactical shell carriers, and are fitted with HeliCoil® stainless steel thread inserts for strength and long life.

Low-tube adapters feature the same low stock elevation as the LEO adapters; High-tube adapters share the proportions of an AR-15, such as an elevated stock height, and include a Picatinny rail on which to mount optics (note: High-tube adapters cannot be used without rail-mounted sights of some kind).

See page 21 for sling loop and hook loop solutions for the Remington stock adapters only.

## TELESCOPING STOCK ADAPTER AND STOCK KITS

Our aluminum adapter kits include everything necessary to retrofit Remington or Mossberg pump shotguns with most AR-15 style stocks and pistol grips. Our adapter kits allow customers to add their own AR-15 stock assemblies as desired.

#91250  
LEO Telescoping Stock Adapter for Rem 870

Our complete stock kits are more comprehensive. They include the aluminum AR adapter; Hogue rubber overmolded grip; US-made five-position M4 SOPMOD style telescoping stock assembly; and all necessary assembly hardware and instructions. The High-tube stock kits also include a receiver-length top Picatinny rail. A push-button sling swivel is included with all stock kits.

## HYDRAULIC RECOIL BUFFER

The ITT Enidine hydraulic recoil buffer can take the place of the receiver extension tube, converting the AR-15 telescoping stock into a recoil-buffered stock assembly without further modification. Recoil-buffered versions are available for all three of the telescoping stock systems, or the recoil buffer can be purchased separately (see page 8).

Our basic kits include the adapter and all necessary installation hardware. No fitting or gunsmithing is required for installation.

### ORDERING INFORMATION

**LEO and Low-tube:** LEO and Low-tube adapters feature a lower stock elevation for use with receiver-mounted sights or no sights at all. While all adapters are designed for installation on 12 gauge shotguns, the LEO and Low-tube Telescoping Stock Adapter for Remington 870 can also be fitted to 20 gauge Remington 870s.

#93180  
LEO Telescoping Stock Kit for Moss 500/590

Part No	Item	MSRP
91250	LEO Telescoping Stock Adapter for Rem 870 .....	70.00
91260	LEO Telescoping Stock Kit for Rem 870 .....	190.00
92230	LEO Telescoping Recoil Stock Kit for Rem 870 .....	315.00
93170	LEO Telescoping Stock Adapter for Moss 500/590 .....	75.00
93180	LEO Telescoping Stock Kit for Moss 500/590 .....	195.00
93220	LEO Telescoping Recoil Stock Kit for Moss 500/590 .....	320.00

Low-tube adapters feature accessory mount points in addition to the flush cup push button sling swivel mounts on both sides.

Part No	Item	MSRP
90230	Low-tube Telescoping Stock Adapter for Rem 870 .....	110.00
90290	Low-tube Telescoping Stock Kit for Rem 870 .....	230.00
92260	Low-tube Telescoping Recoil Stock Kit for Rem 870 .....	355.00
90220	Low-tube Telescoping Stock Adapter for Moss 500/590 .....	115.00
90280	Low-tube Telescoping Stock Kit for Moss 500/590 .....	235.00
92250	Low-tube Telescoping Recoil Stock Kit for Moss 500/590 .....	360.00

**High-tube:** High-tube kits and adapters are designed for rail-mounted optics; *all High-tube kits include a top Picatinny rail.* Mossberg 500 kits are available with adapter-mount rail or receiver mount rail. The receiver mount rail is recommended. It can be installed on post-1996 Mossberg shotguns with factory-tapped mounting holes in the top of the receiver, and allows access to the Mossberg tang safety switch.

## BUTT PADS AND RECOIL BUFFERS

Because those M4 telescoping stocks were not designed with shotguns in mind they aren't the most comfortable buttstocks. We recommend you use some kind of butt pad, and we offer two styles. USGI-style slip-on rubber butt pads expand the butt's surface area and make it easier and more comfortable to shoulder and fire your weapon, though they do not offer any recoil absorption.

LimbSaver slip-on recoil pads feature a patented three-step recoil reduction technology that reduces up to 70% of felt recoil, and maintains target acquisition. They feature a 12 month warranty by Limbsaver.

Any Mesa Tactical telescoping stock kit can be upgraded with an ITT Enidine hydraulic recoil buffer to reduce felt recoil by up to 70%. These hydraulic recoil buffer assemblies are guaranteed by ITT Enidine for 20 million cycles, and replace the receiver extension tubes in our stock kits. They are of mil-spec diameter, giving them a snug fit with mil-spec buttstocks; and a looser, though still tolerable fit with “commercial” aftermarket buttstocks. Purchase either a complete replacement M4 SOPMOD recoil buttstock assembly, or the “drop in” hydraulic buffer alone.

#92170  
Enidine Shot Stock Hydraulic Buffer (Mil-spec)

Additional Limbsaver and standard rubber butt pads for the Urbino Tactical stocks can also be ordered separately.

**ORDERING INFORMATION**

Part No	Item	MSRP

90530	LimbSaver® Butt pad for Urbino Tactical Stock .....	60.00

**PGO BREACHING GRIPS**

Our PGO adapters and grips answer the professional’s desire for a breaching grip with the same robust high quality as our LEO telescoping stock adapters. Cast from aircraft aluminum, the PGO adapter accepts any AR-15 grip and features a horn at the rear to make it the most comfortable breaching style grip on the market. The adapter is available separately, or bundled with the rubber overmolded ERGO Grip®.

# SURESHELL™ SHOTSHELL CARRIERS

#92000  
SureShell Carrier and Rail for  
Benelli SuperNova  
(4-Shell, 12-GA)

Our SureShell shotshell carriers were developed in response to requests from law enforcement agencies and armorers for shell carrier solutions that retained ammunition reliably and could withstand the rigors of daily use and abuse. Fabricated from aircraft aluminum, they feature an innovative rubber friction retention system and tough construction to endure years of use and abuse. Since their introduction in the spring of 2005, they have rapidly become our best-selling accessories, and an emerging industry standard.

SureShell carrier yokes are milled from 6061-T6 aircraft aluminum, then bead blasted and mil-spec hard anodized for a rugged non-glare finish. SureShell yokes are secured to application-specific brackets, and some SureShell carriers include high temperature adhesive-backed die-cut rubber gaskets to protect the host shotgun's finish.

## RECEIVER MOUNT SURESHELL SHOTSHELL CARRIERS

Most of our SureShell shotshell carriers mount directly to the receiver of leading shotgun platforms.

### REMINGTON

Mesa Tactical offers two methods for mounting SureShell shotshell carriers to Remington 870, Remington 1100 and Remington 11-87 shotguns. Our traditional side mount SureShell carriers attach via flat aluminum brackets to the sides of the shotgun receiver. We also offer unique saddle rail SureShell carriers that combine a shell carrier with a MIL-STD-1913 Picatinny rail that accepts optical sights.

Remington SureShell carriers are available in both 12 gauge and 20 gauge models. Several 12 gauge carriers are offered with REAL-TREE® camouflage pattern.

#90320  
SureShell Carrier for Remington 870  
(4-Shell, 12-GA) (left side)

#93250  
SureShell Carrier for Remington 870  
(6-Shell, 20-GA)

### SIDE MOUNT

The receiver mounting scheme of our receiver mount SureShell carriers for the Remington shotguns depends on a combination of steel fasteners threaded into a steel pin (at the rear) and paired Chicago screws (up front) for more secure attach-

ment to the shotgun without the risk of pinching the receiver. The mounting plate even features a window over the shotgun serial number location, to make it easier for armorers to inventory their weapons.

Note that SureShell shotshell carriers cannot be installed on the right side of Remington semi-auto shotguns.

To use a six- and eight-shot SureShell carrier mounted on the left side of a pump shotgun, you must use a tactical forend that does not overlap the receiver, or a factory forend that is cut down appropriately. Sure-Fire® forends are fully compatible with our six-shot SureShell carriers, but will need about ½ inch shaved off the end to be installed with our eight-shot SureShell carriers.

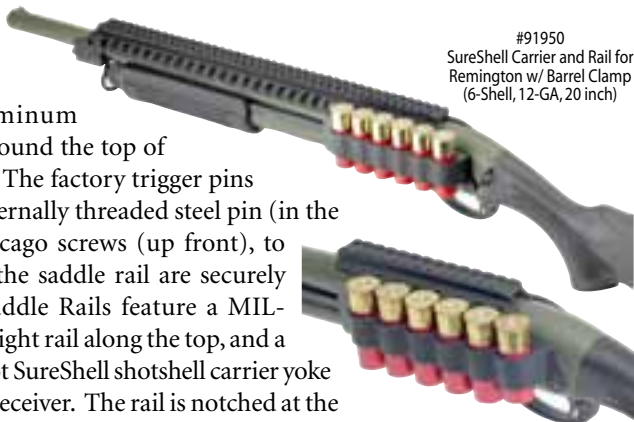

### ORDERING INFORMATION

Part No	Item	MSRP
90320	SureShell Carrier for Remington (4-Shell, 12-GA) (Left Side) .....	60.00

93260	SureShell Carrier for Remington (8-Shell, 20-GA) .....	80.00

### SADDLE MOUNT

Mesa Tactical Saddle

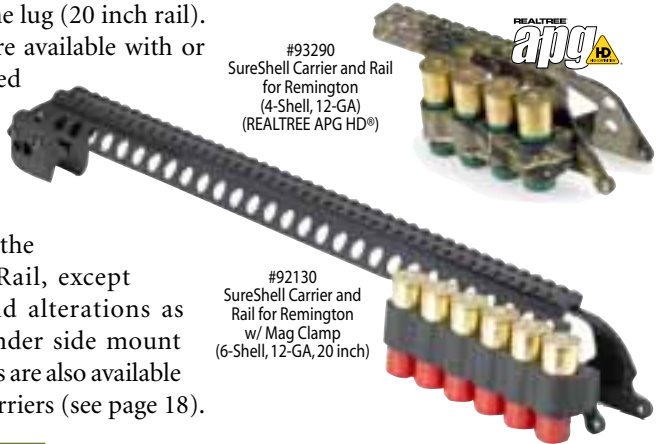

Rails comprise aluminum brackets that wrap around the top of the shotgun receiver. The factory trigger pins are replaced by an internally threaded steel pin (in the rear) and paired Chicago screws (up front), to which both sides of the saddle rail are securely bolted. SureShell Saddle Rails feature a MIL-STD-1913 Picatinny sight rail along the top, and a four-, six- or eight-shot SureShell shotshell carrier yoke on the left side of the receiver. The rail is notched at the rear to accommodate Scattergun/Wilson style ghost ring sights, and extends to the front of the shotgun receiver (5 inch rail), 2¾ inches past the front of the receiver (8½ inch rail), or just beyond

#91630  
SureShell Carrier and Rail for Remington (6-Shell, 12-GA, 5 inch)

the barrel's magazine lug (20 inch rail). The 20 inch rails are available with or without the required Magazine Clamp or Barrel Clamp.

No fitting or gunsmithing is required to install the SureShell Saddle Rail, except for optional forend alterations as described above under side mount carriers. Saddle Rails are also available without the shell carriers (see page 18).

#93290  
SureShell Carrier and Rail  
for Remington  
(4-Shell, 12-GA)  
(REALTREE APG HD®)

#92130  
SureShell Carrier and  
Rail for Remington  
w/ Mag Clamp  
(6-Shell, 12-GA, 20 inch)

**ORDERING INFORMATION**

91970	SureShell Carrier and Rail for Remington (4-Shell, 12-GA, 20 inch, no clamp incl.)	180.00
91980	SureShell Carrier and Rail for Remington (6-Shell, 12-GA, 20 inch, no clamp incl.)	180.00
91990	SureShell Carrier and Rail for Remington (8-Shell, 12-GA, 20 inch, no clamp incl.)	195.00

**MOSSBERG**

The receiver mounting scheme of our receiver mount shotgun SureShell shotshell carriers for the Mossberg 500/590 substitutes two custom-machined steel Chicago screws for the trigger pin. At the front of the mounting

#90390  
SureShell Carrier for  
Moss 500/590  
(6-Shell, 12-GA)

plate, custom retaining steel hardware is used with an elongated extractor screw and a machined key hole in the plate. The Mossberg 930 mounting system is similar, except it uses two sets of Chicago screws in place of the two trigger pins. The mounting plate was designed not to obscure the receiver serial number to make it easier for armorers to inventory their weapons.

SureShell shotshell carriers for the Mossberg fit on the left side of the receiver only. You must use a tactical forend that does not significantly overlap the receiver, or a factory forend that is cut down appropriately. SureFire forends will work fine with no alterations.

### ORDERING INFORMATION

Part No	Item	MSRP
91240	SureShell Carrier for Moss 500/590 (4-Shell, 12-GA) .....	65.00
90390	SureShell Carrier for Moss 500/590 (6-Shell, 12-GA) .....	70.00

93020	SureShell Carrier for Moss 930 (4-Shell, 12-GA) .....	65.00
93030	SureShell Carrier for Moss 930 (6-Shell, 12-GA) .....	70.00
93040	SureShell Carrier for Moss 930 (8-Shell, 12-GA) .....	85.00

## BENELLI

As with the Remington SureShells, there are two mounting methods for SureShell carriers on the Benelli platforms; side mount and top mount (with integrated optics rail).

#90830  
SureShell Carrier  
for Benelli M1/M2  
(4-Shell, 12-GA)

### SIDE MOUNT

Our side mount shotgun SureShell shotshell carriers for the Benelli M1/M2 substitute custom-made steel Chicago screws for the trigger pin. The mounting plate is curved to hug the shotgun receiver, preventing movement of the SureShell assembly.

SureShell shotshell carriers for the Benelli M1/M2 fit on the left side of the receiver only; they are known to fit onto Benelli M3 shotguns as well as M1 and M2 models. Extra weight on the weapon may adversely affect the reliable cycling of inertia-operated shotguns such as the Benelli M1 or M2 when used with low-recoil ammunition.

### ORDERING INFORMATION

Part No	Item	MSRP
90830	SureShell Carrier for Benelli M1/M2/M3 (4-Shell, 12-GA) .....	65.00
90840	SureShell Carrier for Benelli M1/M2/M3 (6-Shell, 12-GA) .....	70.00
90850	SureShell Carrier for Benelli M1/M2/M3 (8-Shell, 12-GA) .....	85.00

## SHELL CARRIER WITH RAIL

While the Benelli M2 Tactical semi-automatic and Benelli SuperNova® pump-action shotgun feature factory-tapped rail mounting holes in the top of the receiver, the Benelli M4 and M1014 are shipped with a top Picatinny sight rail. These provided us with an opportunity to develop SureShell shotgun shell carrier mounting solutions for Benelli shotguns that are streamlined and very robust.

#90880  
SureShell Carrier  
and Rail for Benelli  
M4/M1014  
(6-Shell, 12-GA)

Receiver mount SureShell shotgun shell carriers for the Benelli M2, M4 and M1014 feature mounting brackets with integral top Picatinny sight rails. These brackets are secured to the weapon using the top mounting screw holes. The SureShell shotgun shell carriers are thus slung on the left side of the receiver, securely fastened at the top. No other shell carrier mounting method is as secure or looks as good. SureShell shotgun shell carriers for the Benelli M2 Tactical can be installed on Benelli M1 shotguns *with round-top receivers* by tapping the top of the shotgun receiver with #8-40 threads. Consult a gunsmith.

Extra weight on the weapon may adversely affect the reliable cycling of inertia-operated shotguns such as the Benelli M1 or M2 when used with low-recoil ammunition. The Benelli M4 is gas-operated and has no such sensitivity.

## ORDERING INFORMATION

Part No	Item	MSRP
91210	SureShell Carrier and Rail for Benelli M2 Tactical (4-Shell, 12-GA, 4½ inch)	95.00
91220	SureShell Carrier and Rail for Benelli M2 Tactical (6-Shell, 12-GA, 4½ inch)	100.00
91230	SureShell Carrier and Rail for Benelli M2 Tactical (8-Shell, 12-GA, 4½ inch)	115.00

92020	SureShell Carrier and Rail for Benelli SuperNova (8-Shell, 12-GA, 5½ inch)	115.00

## STOCK MOUNT

Our Stock Mount SureShell carriers fit on most Benelli pistol grip fixed stocks. The rugged stamped steel SureShell bracket replaces the stock's sling loop and mounts four additional shells securely on the side of the stock (does not fit on Benelli M4 stocks, nor will this shell carrier fit on the Urbino Tactical stock; for the latter application, see page 16).

#91840  
Stock Mount SureShell Carrier  
for Benelli M1/M2  
(4-Shell, 12-GA)

**ORDERING INFORMATION***Part No Item**MSRP*

91840	Stock Mount SureShell Carrier for Benelli M1/M2 (4-Shell, 12-GA) .....	55.00
-------	--	-------

**FN SLP**

The mounting system for the SureShell carrier for the FN Self-loading Police shotgun is similar to that of the Mossberg 930, with two sets of Chicago screws in place of the two trigger pins.

SureShell shotgun carriers for the FN SLP fit on the left side of the receiver only, and will not interfere with the forend.

**ORDERING INFORMATION***Part No Item**MSRP*

90110	SureShell Carrier for FN SLP (4-Shell, 12-GA) .....	70.00
90120	SureShell Carrier for FN SLP (6-Shell, 12-GA) .....	75.00
90130	SureShell Carrier for FN SLP (8-Shell, 12-GA) .....	90.00

## M4 SOPMOD BUTTSTOCK MOUNT SURESHELL SHOTSHELL CARRIERS

SureShell carriers are also available for the M4 SOPMOD buttstocks (the kind that we supply with our telescoping stock kits). Offered in four- and six-shell versions, these fit securely to standard M4 SOPMOD style stocks from Mesa Tactical as well as other suppliers. Though designed to be installed on the right side of the buttstock, they can be inverted and installed on the left side if necessary.

#93340  
SureShell Carrier for  
M4 SOPMOD Stock  
(4-Shell, 12-GA)  
(Right Side)

**ORDERING INFORMATION***Part No Item**MSRP*

93340	SureShell Carrier for M4 SOPMOD Stock (4-Shell, 12-GA) (Right Side) .....	60.00

# SURESHELL SHOTSHELL CARRIERS FOR THE URBINO TACTICAL STOCK

Urbino Tactical stocks with cheek risers can accept SureShell carriers secured right on to the cheekpieces themselves. As with our other SureShell products, these shell carriers feature all aluminum construction.

## ORDERING INFORMATION

Part No	Item	MSRP
90140	SureShell Carrier for Urbino Cheek Riser (4-Shell, 12-GA) (Right Side) .....	65.00
90150	SureShell Carrier for Urbino Cheek Riser (6-Shell, 12-GA) (Right Side) .....	70.00
90160	SureShell Carrier for Urbino Cheek Riser (4-Shell, 12-GA) (Left Side) .....	65.00
90170	SureShell Carrier for Urbino Cheek Riser (6-Shell, 12-GA) (Left Side) .....	70.00

# ADAPTER MOUNT SURESHELL SHOTSHELL CARRIERS

Traditional on-gun shell holder solutions require alterations to the shotgun. To make things simpler for users of our telescoping stock adapter systems, our first SureShell shotshell carriers were designed to be attached to the side mount points of our High-tube and Low-tube telescoping stock adapters. The push-button sling swivel mounting capability is still retained when a mounting point is used for a SureShell shotshell carrier, and a single telescoping stock adapter can accommodate multiple SureShell shotshell carriers at one time.

## ORDERING INFORMATION

Part No	Item	MSRP
90370	Adapter Mount SureShell Carrier (4-Shell, 12-GA) .....	60.00
90380	Adapter Mount SureShell Carrier (6-Shell, 12-GA) .....	65.00
90610	Adapter Mount SureShell Carrier (8-Shell, 12-GA) .....	80.00

# BARREL AND MAGAZINE CLAMPS FOR THE REMINGTON 870

Mesa Tactical Magazine and Barrel Clamps provide mounting points for Picatinny rails, weapon lights and sling attachments near the muzzle of a tactical shotgun. Both designs are CNC machined 6061-T6 aluminum, Type III anodized to military specifications. Threaded attachment points feature HeliCoil steel thread inserts for long thread life, even after repeated mounting and removal of accessories.

The Mesa Tactical Magazine Clamp can be used to more securely retain aftermarket or factory magazine extensions, while at the same time offering flexible accessory mounting options near the shotgun muzzle. Magazine clamps are available with a push-button quick release sling swivel or a two inch MIL-STD-1913 Picatinny rail that can accept standard weapon light mounts.

The Magazine Clamp can also be used to mount one inch diameter weapon lights simply by clamping one side to the shotgun barrel and the other side to the light body (recommended for use with shotguns with tall front sight posts).

Our Barrel Clamp offers an accessory mount point for shotguns that do not have extended magazines. Its unique clamping mechanism ensures a secure fit even under recoil.

Mesa Tactical Magazine and Barrel Clamps can accept accessories made for Mesa Tactical Stock Adapters, including Mesa Tactical Adapter Mount Rails (see page 20) and Mesa Tactical Adapter Mount Sling Attachments (see page 24).

Though designed for the Remington 870 pattern shotguns, the Magazine Clamp is also known to fit the Mossberg 930 semi-automatic shotgun.

## ORDERING INFORMATION

Part No	Item	MSRP
90800	Magazine Clamp for Remington (12-GA) .....	55.00
90650	Magazine Clamp w/ Sling Swivel for Remington (12-GA) .....	65.00
90810	Magazine Clamp w/ Rail for Remington (12-GA) .....	80.00
90700	Barrel Clamp w/ Rail for Remington (12-GA) .....	80.00

# PICATINNY RAILS

Mesa Tactical has long been a supplier of MIL-STD-1913 Picatinny rails for tactical shotguns. A Picatinny rail for the mounting of sighting optics is included with every Mesa Tactical

High-tube Telescoping Stock Adapter Kit. Additional Picatinny rails are also available for the mounting of optics and accessories, such as lights and lasers.

Adapter-mount rails are designed to be attached to telescoping stock adapter accessory mount points, requiring no alterations to the shotgun. These are also compatible with Mesa Tactical Barrel Clamps and Magazine clamps (see page 17).

Receiver-mount rails are made to be mounted onto the receivers of Remington, Mossberg, and Benelli shotguns with pre-drilled and tapped mounting holes. These rails can also be used with weapons that are custom drilled and tapped.

All Mesa Tactical Picatinny rails are machined from 6061-T6 aircraft quality aluminum, and finished with mil-spec Type III hard anodizing. Mesa Tactical Picatinny rails include all necessary mounting hardware.

#90770  
Picatinny Rail for Moss 500/590  
(Standard Profile, 4½ inch)

## RECEIVER MOUNT PICATINNY RAILS

Mesa Tactical offers two methods for mounting Picatinny rails to tactical shotguns. For Remington shotguns, we offer the Mesa Tactical Saddle Rail, which mounts to both side of the receiver and wraps around the top. Top mount rails work with Remington, Mossberg and Benelli shotguns that feature factory tapped rail mounting holes in the top of the receiver.

## REMINGTON SADDLE RAILS

Mesa Tactical Saddle Rails comprise 6061-T6 aluminum brackets that wrap around the top of the shotgun receiver. The factory trigger pins are replaced by an internally threaded steel pin (in the rear) and paired Chicago screws (up front), to which both sides of the saddle rail are securely bolted. The saddle rail is Type III anodized for a rugged surface finish.

#91670  
Saddle Rail for Remington  
(12-GA, 8½ inch)

Our Saddle Rail is specially contoured to allow operation of a semi-automatic bolt on the right side of the receiver, so it can be installed on Remington 1100 and Remington 11-87 semi-auto shotguns as well as Remington 870 pump shotguns. The rail is notched at the rear to accommodate Scattergun/Wilson style ghost ring sights, and extends to the front of the shotgun receiver (5 inch rail), 2¾ inches past the

front of the receiver (8½ inch rail), or just beyond the barrel’s magazine lug (20 inch rail). The 20 inch rails are available with or without the required Magazine Clamp or Barrel Clamp.

No fitting or gunsmithing is required to install.

#91680  
Saddle Rail for Remington  
w/ Magazine Clamp  
(12-GA, 20 inch)

**ORDERING INFORMATION**

Part No	Item	MSRP
91620	Saddle Rail for Remington (12-GA, 5 inch)	75.00
91670	Saddle Rail for Remington (12-GA, 8½ inch)	90.00
90980	Saddle Rail for Remington w/ Barrel Clamp (12-GA, 20 inch)	195.00
91680	Saddle Rail for Remington w/ Magazine Clamp (12-GA, 20 inch)	195.00
90990	Saddle Rail for Remington (12-GA, 20 inch, no clamp included)	135.00

See page 11 for SureShell Saddle Rails that feature a four-, six- or eight-shot SureShell shotshell carrier yoke on the left side of the receiver.

**REMINGTON SIDE-MOUNT RAIL**

Recently Mesa Tactical was asked by several law enforcement agencies to produce a Picatinny rail that can be mounted on the right side of the Remington 870 and allow a weapon light to be secured behind the ejection port. This is for door breachers who need more light in tight quarters where lights near the muzzle would be unsuitable. We also offer a rail for the left side of the receiver. These rails are compatible with SureShell carriers mounted on the opposite side of the receiver. As with all our rails, these are is machined to the MIL-STD 1913 specification from 6061-T6 aluminum, and features a mounting system similar to that of our SureShell shotshell carriers.

#92150  
Side Mount Picatinny Rail  
for Remington 870  
(Right Side)

**ORDERING INFORMATION**

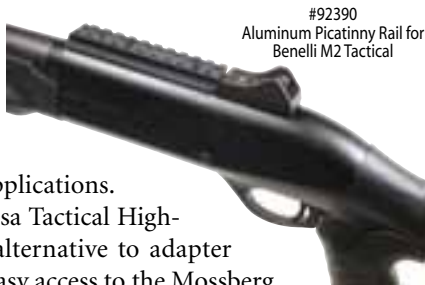

Part No	Item	MSRP
92150	Side Mount Picatinny Rail for Rem 870 (Right Side)	60.00
92350	Side Mount Picatinny Rail for Remington (Left Side)	60.00

**RAILS FOR DRILLED AND TAPPED RECEIVERS**

Mesa Tactical makes Picatinny optics rails for several popular shotgun models that feature pre-drilled and tapped holes in the tops of their receivers.

Top rails for the Remington 870 use the tactical hole pattern introduced on some tactical 870 models in the summer of 2007.

Mossberg rails attach directly to the receivers of late-model (1997 and later) Mossberg pump shotguns with pre-tapped holes.

#92390  
Aluminum Picatinny Rail for  
Benelli M2 Tactical

Standard profile Mossberg rails are for general purpose optics mounting applications. Tall profile rails are only for use with Mesa Tactical High-tube telescoping stock adapters, as an alternative to adapter mount rails. Receiver mount rails allow easy access to the Mossberg safety switch.

The hardware included with the Remington and Mossberg rails are for pump action shotguns. They can be used with semi-auto versions (Remington 1100 and Remington 11-87, or Mossberg 930) by grinding the fasteners down to the appropriate lengths.

Rails for the Benelli M2 Tactical and Benelli SuperNova Tactical mount just forward of the ghost ring sights, extending to the front of the receiver. Benelli M2 Tactical rails can also be installed on *round-top* Benelli M1 receivers after drilling and tapping the top of the shotgun receiver with #8-40 threads. Consult a gunsmith.

### ORDERING INFORMATION

Part No	Item	MSRP
92370	Picatinny Rail for Remington (5 inch) .....	35.00
92380	Picatinny Rail for Remington (8½ inch) .....	50.00
90770	Picatinny Rail for Moss 500/590 (Standard Profile, 4½ inch) .....	40.00
92390	Picatinny Rail for Benelli M2 Tactical (4½ inch) .....	40.00
92400	Picatinny Rail for Benelli SuperNova (5½ inch) .....	40.00

## ADAPTER MOUNT PICATINNY RAILS

Adapter Mount Picatinny Rails fasten to the accessory mount points on the sides of Mesa Tactical High-tube and Low-tube telescoping stock adapters, not on the shotgun receiver. They can also be used with our Barrel Clamps and Magazine Clamps, which feature the same mounting hole pattern as our stock adapters.

#91130  
Adapter Mount Standard  
Profile Picatinny Rail,  
3-1/2"

Standard profile rails like the Stubby adhere to the minimum height requirement of the MIL-STD-1913 specification, and should not be used for mounting optics with the High-tube telescoping stock adapters.

Tall profile rails are designed to mount optics for use with High-tube telescoping stock adapters, or to mount accessories slightly away from the receiver when fastened to the telescoping stock adapter side accessory mount points. When used for optics, the elevation of the tall profile rails is similar to that of a flat top AR-15.

## ORDERING INFORMATION

The following two tall profile rails feature an attachment point at one end of the rail.

Part No	Item	MSRP
90400	Adapter Mount Picatinny Rail (Tall Profile, 9 inch)	50.00
90410	Adapter Mount Picatinny Rail (Tall Profile, 5½ inch)	35.00

The following standard profile rails feature attachment points along the length of the rail.

Part No	Item	MSRP
91110	Adapter Mount Standard Profile Picatinny Rail, 7½ inch	40.00
91120	Adapter Mount Standard Profile Picatinny Rail, 5½ inch	35.00
91130	Adapter Mount Standard Profile Picatinny Rail, 3½ inch	30.00
90690	Adapter Mount Standard Profile Picatinny Rail, 2 inch	25.00

## SLING LOOP AND HOOK LOOP SOLUTIONS

#91340  
Push-button Sling Swivel  
Magazine Cap for Remington  
870/1100/11-87

Many operators have requested a more robust sling mounting alternative to our push-button sling swivels. Our answer is a line of rugged steel sling loops and hook loops designed to be fastened to the mount points of our telescoping stock adapters, or to the receivers of popular shotgun models.

Sling loops are designed to accept USGI standard 1¼ inch webbing. Hook loops accommodate HK-style quick-release sling hooks. Our hook loops and sling loops are stamped 11 gauge steel, with a mil-spec manganese phosphate finish.

## RECEIVER MOUNT SLING LOOPS AND HOOK LOOPS

Our innovative Sling and Hook Loops provide a way to securely attach a tactical sling directly to the shotgun receiver. They are excellent solutions for single-point slings, or for the receiver end attachment of three-point slings. They can be employed as alternatives to Burnsed loops or other attachment methods that are incompatible with custom stocks.

#90940  
Push-button Sling Swivel  
for Remington 870/1100/11-87

## REMINGTON

The Remington shotgun's rear trigger group pin is replaced by a stainless steel standoff with female threads, into which the steel sling loop retainer, or bushing, can be tightly screwed. The sling or hook loop is free to rotate about the retainer. A rubber gasket keeps the sling loop from marring the receiver finish.

Our Push-button Sling Swivel Mount is secured to the shotgun in the same way as the sling loop, except it allows the use of a sling swivel that can be removed from the weapon with the press of a button. We include a US-made Push Button Sling swivel with the mount.

#90330  
Sling Loop for  
Remington  
870/1100/11-87

Sling mounts are finished with mil-spec manganese phosphate. All our receiver mount sling attaching solutions are fully compatible with our four-shot and six-shot receiver mount SureShell shotshell carriers (but not the eight-shot versions).

### ORDERING INFORMATION

Part No	Item	MSRP
90330	Sling Loop for Remington .....	20.00
90930	Hook Loop for Remington .....	20.00
90940	Push-button Sling Swivel for Remington .....	25.00

### RECEIVER-BACK HOOK LOOPS

In addition to sling mounts replacing the rear trigger pin, we also offer a limited line of hook loops that mount behind the Remington 870 receiver, between the receiver and the factory stock. These were produced at the request of a large US Federal enforcement agency. Unlike similar designs, the Mesa Tactical hook loops are machined from 1018 carbon steel, then given a mil-spec manganese phosphate finish. Some fitting with a file may be required.

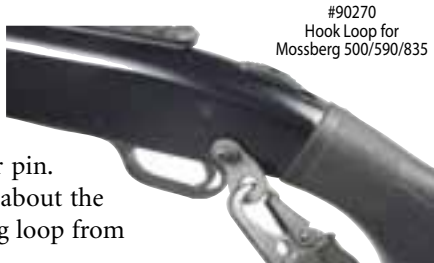

#93330  
Receiver-back  
Ambi Hook Loop  
for Rem 870

### ORDERING INFORMATION

Part No	Item	MSRP

93330	Receiver-back Ambi Hook Loop for Remington .....	45.00

### MOSSBERG

The receiver mounting scheme of our sling and hook loops for the Mossberg 500/590/835 substitutes custom-machined Chicago fasteners for the trigger pin. The sling or hook loop is free to rotate about the retainer. A rubber gasket keeps the sling loop from marring the receiver finish.

#90270  
Hook Loop for  
Mossberg 500/590/835

Our Push-button Sling Swivel Mount is secured to the shotgun in the same way as the sling loop, except it allows the use of a sling swivel that can be removed

from the weapon with the press of a button. We include a US-made Push Button Sling swivel with the mount.

Sling mounts are finished with mil-spec manganese phosphate. All our receiver mount sling attaching solutions are fully compatible with our four-shot and six-shot receiver mount SureShell shotshell carriers (but not the eight-shot versions).

**ORDERING INFORMATION**

Part No	Item	MSRP
90260	Sling Loop for Moss 500/590 .....	25.00
90270	Hook Loop for Moss 500/590 .....	25.00

93370	Hook Loop for Moss 930.....	25.00
93380	Push-button Sling Swivel for Moss 930 .....	30.00

**BENELLI**

For the Benelli M1014 semi-automatic shotgun, we substitute custom-machined steel fasteners for the split pin in the skeleton stock’s pistol grip assembly.

Our Push-button Sling Swivel Mount is secured to the shotgun in the same way as the sling loop, except it allows the use of a sling swivel that can be removed from the weapon with the press of a button. We include a US-made Push Button Sling swivel with the mount. Sling mounts are finished with mil-spec manganese phosphate.

These sling and hook loop mounts are *only compatible with the skeleton style stock* for the Benelli M1014. Some drilling and fitting may be required.

**ORDERING INFORMATION**

91430	Hook Loop for Benelli M1014 .....	25.00
91330	Push-button Sling Swivel for Benelli M1014 .....	30.00

# MAGAZINE CAP SLING LOOPS AND HOOK LOOPS

Our steel Sling Mount Magazine Caps for the Remington 870 and Remington 1100 replace the factory magazine caps and provide forward sling attachments for three-point and carry slings. Sling loops and hook loops are indexed to the barrel to position the sling to the right or to the left, instead of straight down, to keep it out of the way of SureFire weapon light forends. The Ambi Hook Loop features two loops hanging to either side.

Sling mounts are finished with mil-spec manganese phosphate. Sling Mount Magazine Caps fit Remington 870 Police, Tactical and HD models only. They can also be installed on Remington 1100 and 11-87 models with ball bearing magazine cap detents in their forends. Call for application questions.
